### NEW Soprano ST Laser for Pain-Free

#### Skin Tightening, Toning & Firming

Wouldn't you like to turn back the clock and regain the fresh, youthful skin of a carefree teenager? Here, we all would. But until science develops a real-life fountain of youth or time-stall technology, Soprano ST offers the next best thing. Soprano ST applies a revolutionary IN-A-MOTION approach to laser treatment, and that leads up the deeper layers of the skin in a pulsating manner. This deep-dermal heating is proven over many years of study to effectively stimulate the production of new collagen and improve skin texture/texture. Treatments with the Soprano ST system are quick and discreet, require anesthesia or a painkiller if necessary time. Patients can resume their normal activities immediately. Best of all, Soprano ST provides steady improvement with excellent, long-term skin tightening results.

The Soprano Skin Tightening treatment can be used all over the body, but is most commonly used on the Stomach, Thighs and Buttocks.
